Why Computers and Beyond?

We are a Southwest Minnesota based company that has been in business for more than 7 years. Our staff has experience going back many more years than that working with users needs that range from home and small business to many different kinds of medium businesses to Fortune 500 companies.

And we will work with you in person. We are always available to answer your questions over the phone, but with us you also have the option of sitting down and discussing your needs so that we will be able to work with you to find a solution. Both when you need a new computer and when you need help with the one you already have. One of our promises is that your call for support will never be re-routed to another company that has no idea who you are or out of the country to save a few dollars at the expense of your service satisfaction.

One of our biggest challenges is the perception that you will get a better deal by buying from one of the mail order computer companies or high volume, discount department stores. If you are totally self sufficient and know everything you need to know to keep it running at its best the few dollars you save MAY be worth it. The difference in price is more a product of marketing than a real difference in what you will pay for a system that will meet your needs, both today and in the future years that you hope to have with this investment.

Next time you are considering upgrading your computing power come talk to us. The combination of our competitive prices and the desire and ability to make sure you are getting the most from your investment will make the trip well worth your time.

List Created 05/31/09 prices subject to change.
